KEY FEATURES

- **Gyroscopic stabiliser**

Anchorage stays comfortable when the sea gets up. That is the practical difference between lunch at anchor and heading back to port, and most Prestige 560s currently on the market do not have it.

- **Independence away from the dock**

Watermaker, ice maker, independent air conditioning in every cabin, tender with outboard and hydraulic bathing platform. Several days at anchor without water or logistics constraints.

- **Three helm stations and joystick**

Internal helm, flybridge and cockpit, with bow thruster. Handling eighteen metres in a crowded marina is a single-handed job, with no one needed on the dock.
