

PRINCESS 48 « ENERGY »

1992 | 15.39 m | FOR SALE

OVERVIEW

The Princess 48 Flybridge is one of the iconic models built by the renowned British shipyard Princess, celebrated for its outstanding build quality, timeless styling and exceptional seaworthiness. Featuring a Deep V hull, she delivers smooth, comfortable and confident cruising in a wide range of sea conditions.

This 1992 Princess 48 "Energy" features a highly sought-after layout with three genuine double cabins, two bathrooms, a bright panoramic saloon and a spacious flybridge, making her an ideal yacht for family cruising or entertaining guests in complete comfort.

Powered by twin Caterpillar 3208 diesel engines producing 380 HP each, with only 1,100 engine hours, she comfortably cruises at 20 knots and reaches a top speed of 25 knots, while benefiting from Caterpillar's legendary reliability.

Designed for outdoor living, the teak cockpit features a large folding dining table, while the flybridge comfortably seats up to six guests and includes two helm seats with excellent visibility. A flybridge access ladder, swimming ladder, gangway and generous sunbathing areas complete the exterior. A stand-up paddle board is also included with the yacht.

Inside, the bright panoramic saloon comfortably accommodates six guests around one elegant wooden coffee table. The fully equipped galley includes a refrigerator, freezer, microwave, cooktop, sink and hot water system. The full-beam owner's cabin benefits from overhead and side windows, creating a bright and airy atmosphere, and features its own private ensuite bathroom. The two guest cabins share a second bathroom, making the yacht perfectly suited for extended cruising.

This Princess 48 is an outstanding opportunity to own a well-built and highly respected flybridge yacht. Combining proven Caterpillar reliability, generous accommodation, excellent sea-keeping abilities, she is perfectly suited for enjoying the French Riviera.
