

SOLARIS 55

2022 | 16.7 m | FOR SALE

An aerial, high-angle photograph of a Solaris 55 sailboat on the water. The boat is viewed from the stern, showing the cockpit with two helm stations, the cabin, and the mast. The deck is finished with teak planking. The water is a deep blue with some whitecaps. The overall tone is professional and elegant.

OVERVIEW

If you are like us, you don't just want a sailboat; you want an absolute sailing experience. You want the fingertip sensitivity of a racer, but the comfort of a luxury floating penthouse. You want to be able to sail short-handed without sacrificing speed or safety.

This 2022 Solaris 55 is the answer. Designed by the legendary Javier Soto Acebal, she embodies the perfect balance between minimalist aesthetics and raw marine power. Where other shipyards compromise, Solaris sets the standard: flush teak decks, sleek lines, and exceptional stiffness under sail.

Unlike ordering a new build with an 18-24 month waiting list, this yacht is available immediately. She is in near-new condition, meticulously maintained, and configured with over €400k in options for total autonomy (Generator, Watermaker, A/C, Solar panels).

This is a rare opportunity to acquire one of the most coveted Performance Cruisers on the market, ready for the upcoming season.
